

Control system for Proofer

VS-1145pr is a controller for operating the camera of the final bread rise and dough products, with the combination of the plus-temperature refrigerator and

automatically change of the regimes (rise and cool). The controller has the following functions:

- Measure and regulate the temperature into the camera with the precision of 2°C.
- Measure and regulate the humidity into the camera with the precision of 4%RH.
- The controller has a watch to indicate the real time, on which the turns of the regimes change in the definite hour of the day can be make.
- The re-switched of the regimes can be make automatically, as well as manually.
- The controller has an output to switched on the fan for the air-circulation into the camera.

-
- ✓ Power supply: 12V/2A
 - ✓ Outputs: 4xNO
 - ✓ Inputs: Temperature and humidity sensor.
 - ✓ Output current:5A
 - ✓ Dimensions: 280x150mm.
-

The front panel is made from the polyester folio on the background of the stainless steel with the thickness of 1,5 mm.
